Non-Woven

What are non-wovens?

Nonwovens are unique, high-tech, engineered fabrics made from fibres and which are used across a wide range of applications and products. Nonwovens are innovative, versatile and indispensable.

Modern life would be quite literally impossible without them.

Felt

Felt is a non woven textile. It is made by compressing and matting fibres together until they connect to form a sturdy fabric.

Today, felt is used in many craft projects. One of the reasons behind the renewed popularity of felt for use in crafts is its sheer versatility.

F01

A dark brown wooden frame with a white background. Inside the frame, the text "Other Materials" is written in a large, bold, dark brown serif font. Below it, the text "210D Nylon", "600D Polyester", and "Lamination Bag" is written in a smaller, dark brown serif font, stacked vertically. To the left of the frame, a small green succulent in a white pot is visible.
